

COMMENTS ON THE REASONS FOR ALLOWANCE

Claims 1-14 were pending. Independent claim 1 was amended to clarify the present invention in response to the Examiner's comments and her supervising Examiner's comments during a telephone discussion on December 13, 2007. The time and effort in discussing the present invention is appreciated. Claims 2 and 3 were canceled and their limitations included in the amended claim 1. No new matter was introduced by the amendments.

Examiner is requested to note the final wording of the claims as listed, such as in claim 1. The wording of claim 1 is of particular note, such as "process and receive" instead of "process a receive" in line 3, and so forth. The renumbering of claims 4-14, and the renumbering of the later claims (e.g., claims 5, 6, 9, 11, and 13 that depend earlier dependent claims), will hopefully be updated before issue.

Applicant's attorney wishes to respectfully note for the file wrapper record one significant clarification to supplement the Reasons for Allowance. The phrase "consisting of one tuner" (as the Examiner and supervising Examiner requested), that was added to the system controller module stated as the first element in claim 1, was added only to indicate that the stated invention has one and only one tuner; but the phrase "consisting of one tuner" was not intended to state or imply that the system controller module is only just a tuner and nothing else. For example, a processor module and a decoder are also part of the system controller module element stated in claim 1.

Applicant's undersigned attorney can be reached at (408) 374-7035. All correspondence should continue to be directed to the address previously indicated.

Respectfully submitted,

Kevin Roe
Reg. No. 40,148
